

Advisor Portfolio Rebalancing & Suitability Review – Initial Requirement Brief

Business Context

Wealth advisors need a digital platform to analyze portfolios and generate compliant rebalancing recommendations.

Problem Statement

Manual processes lead to delays and errors

Compliance validation is reactive

Lack of standardized audit trails

Objectives

Streamline rebalancing workflow

Automate compliance validation

Improve advisor productivity (30–40%)

Reduce compliance effort (40–50%)

Target Users

Financial Advisors

Compliance Officers

Operations Teams

Scope (MVP)

Portfolio dashboard

Portfolio detail view

Rebalancing proposal creation

Suitability validation engine

Approval workflow

Audit trail

AI-generated summaries

Out of Scope

Real-time market integration

Trade execution

User Journey

Advisor logs in

Views dashboard

Selects client

Creates proposal

System validates suitability

Submits for approval

Compliance reviews

Audit recorded

Success Metrics

Faster proposal creation

Reduced review cycles

Improved auditability

Assumptions

Mock data

Simplified rules engine

Risks

Limited realism

Simplified compliance rules
