

Advisor Portfolio Rebalancing & Suitability Review – Discovery Workshop (Meeting Notes)

Objective

Identify requirements for a web-based platform to assist advisors in portfolio rebalancing while ensuring regulatory compliance and suitability checks.

Participants

Head of Wealth Advisory

Senior Financial Advisor

Compliance Officer

Product Manager

Operations Lead

Technology Lead

Current Challenges

Manual, spreadsheet-heavy rebalancing process

Difficulty tracking portfolio drift

Inconsistent compliance reviews

Lack of centralized audit trail

Desired Capabilities

Advisor dashboard with portfolio summary, risk profile, and drift

Rebalancing proposal creation with allocation adjustments

Automated suitability checks

Multi-stage workflow (Draft → Review → Approve/Reject)

Collaboration via comments and versioning

Client-friendly summary generation

Full audit trail

Data Requirements

Client profile (risk, goals, horizon)

Portfolio holdings and allocation

Compliance rules

Non-Functional Considerations

Role-based access

Scalability

Performance

Demo Expectations

End-to-end workflow visibility

Table-based UI with filters

Mock backend allowed

AI-assisted summaries
